

SETTING YOUR EXPECTATIONS

BREAST LIFT SURGERY

# WELCOME

Welcome to CosMediTour, Australia's leading Plastic Surgery Group. We're so excited you've entrusted us to guide and support you throughout your journey.

Helping you confidently prepare for your procedure is a privilege we take very seriously. This includes ensuring that your expectations and assumptions around your procedure are realistic.

Helping you confidently prepare for your procedure is a privilege we take very seriously

We've prepared this Guide to help inform your own Expectation setting process, particularly around scarring, your results, recovery and risks. We do hope you it useful.

If you have any questions at all, our friendly Client Support team is here to help on 1300 000 633.

“Above all, we're here to ensure that you feel confident, safe & supported throughout your journey.

# INTRODUCTION

The expectations, assumptions and beliefs you form ahead of your procedure are important for a number of reasons.

Often subconsciously, your expectations:

- ☑ Guide your decision making.
- ☑ Help you to be emotionally prepared ahead of your procedure and during recovery.
- ☑ Provide a foundation for Surgeon-Patient communication and trust.
- ☑ Become a benchmark to measure your satisfaction after the procedure.
- ☑ Help you to more effectively manage your recovery.
- ☑ Help you to understand and assess your own exposure to risk.

While expectations can be beneficial, pursuing *unrealistic* expectations may result in:

- ☑ Disappointment with your results
- ☑ Emotional distress
- ☑ Surgical complications if your Surgeon's advice is disregarded.
- ☑ Strained Surgeon-Patient relationship.
- ☑ Significant financial outlay for surgery that won't meet your expectations

Your CosMediTour Plastic Surgeon will discuss your motivations and expectations in detail with you. To get the most from your consults, it is important that you are open and honest with your Surgeon and always trust their experience.

The clients most satisfied with their results typically have three things in common. They're open and honest with their Surgeon; are realistic about their results; and they trust their Surgeon's expertise.

# BENEFITS OF BREAST LIFTS

Breast Lifts are conducted to address Ptosis, which refers to sagging or drooping of the breasts. There are three degrees of Ptosis, categorized based on the position of the areola. Your specific degree of Ptosis will determine the surgical technique employed by your plastic surgeon.

Minor

Moderate

Severe

Breast lifts are ideal for women who:

- Have drooping breasts (Ptosis) due to aging, weight fluctuations or pregnancy
- Have breast asymmetry
- Have nipples that face downward or drop below the breast crease
- Want a perkier, more youthful breast shape
- Seek a better fit in bras and bikini tops

There are limitations with any surgical procedure, including Breast Lift Surgery. Understanding these limitations should be your first consideration in setting realistic expectations ahead of your Breast Lift.

# BE REALISTIC ABOUT YOUR RESULTS

## BREAST LIFT SURGERY IS NOT GOING TO GIVE YOU SOMEONE ELSE'S BREASTS

The Breast Lift procedure lifts and reshapes your natural tissue to create a higher-positioned breast, improved nipple position, and overall shape. The result will be more natural than a Breast Augmentation as we are not using an implant. However the benefit of not having an implant, is that your breast will not be weighed down by the heavy implant, therefore there will be less post-op sagging and generally better scarring.

Remember that a Breast Lift is not giving you someone else's breasts. It is just enhancing your own breasts. This means it will magnify what is naturally there. Therefore, any characteristics that you notice now, will still be noticeable to some degree after surgery.

---

### BREAST SIZE

This procedure removes excess skin and tissue to lift and reshape your breasts. This means size reduction is likely, and your surgeon will discuss retaining natural volume.

### CLEAVAGE

Your cleavage will be dictated by how far apart or close together your breasts are before your surgery.

### BREAST SYMMETRY

Complete symmetry is never realistic. If there are differences between your breasts now, you will still notice differences after surgery.

### AGING PROCESS

Lifts combat aging, but can't halt it. Maintenance procedures may be needed to preserve results.

## RESULTS ARE NEVER GUARANTEED & RESULTS VARY

Understand that results are never guaranteed and the outcomes for one patient may not necessarily reflect your results.

Every body type is different and therefore every body can expect a different result from their surgery.

To minimise the risk of disappointment, be sure to ONLY research results for:

- ☑ Those with a similar body type as you
- ☑ Those who have had the same procedure (e.g. if you're not getting breast implants ensure photos are not of breast implants)

## DO YOUR RESEARCH

Compiling photos, particularly Before & Afters, helps our clients to clearly communicate their desires to their Surgeon.

While compelling, please make sure you're not drawing your inspiration from edited sources, or images of people in clothing or bikini tops. These images may not accurately represent surgical outcomes.

Opt instead for credible sources; including Before and After images from CosMediTour or your Plastic Surgeon. Unlike the heavily edited images you may find on your socials, these are an accurate depiction of real-client results.

Each year, thousands of happy clients choose CosMediTour. Our Surgeons are exceptional & their Before & After Photos speak for themselves.

# MAINTAIN AN OPEN MIND

While you will have done your own research, it's important to approach your consults with an open mind and be prepared to shift your expectations in light of the tailored advice from your surgeon.

## A DIFFERENT APPROACH MAY BE SUGGESTED

Your Surgeon may suggest a different approach for your procedure than you were expecting. Your personal Ptosis (sagging or drooping) will dictate the technique your Plastic Surgeon uses for your procedure.

We understand that in some cases, this may be disappointing. However, please seriously consider your Surgeons advice as these adjustments will ensure you achieve a safe, superior and long lasting result.

## TRUST YOUR SURGEON'S KNOWLEDGE & EXPERTISE

Trust the experience of your Surgeon - they've not only had over 12 years of specialist Plastic Surgery training, but also years of experience in performing your procedure.

Rest assured. They want the best possible outcome from your surgery, which of course includes ensuring your safety.

Importantly, if your Treatment Plan is adjusted, then your Surgical Quote will also need to be adjusted.

# EXPECT SOME SCARRING

## SURGICAL INCISIONS

For Breast Lift procedures, CosMediTour offers the following Breast Lift techniques:

PERI-AREOLAR

LOLLIPOP

ANCHOR (T-LIFT)

## PATIENCE IS KEY

Scarring is a natural part of the healing process and all clients will have visible scarring, to some extent after their procedure.

Everyone's scar management journeys are different and we encourage you to be prepared for this.

Some individuals have minimal scarring with minimal effort after surgery. While others will have more visible post-surgery scarring. Some clients also opt to invest in advanced scarring treatments (e.g. Laser Treatment) to improve their outcome.

Initially, scars may appear red, raised, or slightly discoloured. With time and proper wound care, your scars are likely to fade in the months following your procedure.

Looking after yourself post-surgery is vital to your recovery. Quality rest, nutrition and strict adherence to your Surgeon's care instructions have a direct impact on your ability to heal and your final results.

# RECOVERY TAKES TIME

Recovery periods vary from person to person; however, we advise clients to allow 4 - 6 weeks for post-surgery recovery. During this time, it's important to trust the process and closely follow the tailored advice provided by your Surgeon. [CLICK HERE](#) for more information on Breast Lift Recovery.

We're here to support you. If you'd like to discuss your Recovery, or if you have any concerns, please reach out to your Client Manager.

---

## HOSPITAL STAY | Half Day - Overnight

In Australia, Breast Lift Surgery is typically regarded as day surgery. So, assuming good general health, clients can leave hospital 2 to 3 hours after they wake. Clients undergoing the procedure in Thailand are required to stay overnight.

## REST TIME | 2 Weeks

It is normal to feel tired for the first few days after surgery. Clients may also experience slight discomfort during this time, particularly around the incision site.

- ✓ Use ice packs & pain medication to manage pain.
- ✓ Avoid driving and working for at least 2 weeks.
- ✓ Restrict exercise to gentle walking for the first 6 weeks
- ✓ Avoid upper body workouts and strenuous activities for 3-6 months.
- ✓ Wait 6 weeks to resume pool, hot tub, spa, or ocean activities.
- ✓ Sleep on your back with a slight upward incline for at least 6 weeks, or follow your surgeon's guidance.

## RECOVERY TIME | 6 Weeks

To ensure optimal healing, post-surgery support garments must be worn for 6 weeks. Prolonged use of a support bra enhances lasting results.

## SETTLING PERIOD | 6 Months

Breasts will become softer & more natural during this time. Scars may take up to 18 months to fade.

# KNOW THE RISKS

It's important to be aware that all surgical procedures carry risks. Understanding these risks and taking precautions to minimise them will be key to your recovery.

[CLICK HERE](#) for more information on Surgical Risks & important ways you can minimise your own risk.

---

## UNDERSTANDING THE RISKS

Despite choosing a skilled Plastic Surgeon, receiving care in a premium hospital, and following recovery protocols, complications and risks can still occur. What's more, just like recovery timeframes, risk varies from person-to-person.

Prior to providing surgical consent, your Plastic Surgeon will thoroughly assess and explain your exposure to risk and discuss your individual recovery.

For further advice or clarification on surgical risk and your recovery, please consult your Plastic Surgeon, GP or other appropriately qualified health practitioner.

## MINIMISE YOUR OWN RISK

- ☑ Closely read all documentation from your Surgeon/CosMediTour.
- ☑ Precisely follow all advice from CosMediTour and your Surgeon.
- ☑ Disclose your full medical history, medications, vitamins, supplements and smoker status.
- ☑ Be in great physical health prior to surgery.
- ☑ Ensure you have realistic goals.
- ☑ Prepare questions for your surgeon before surgery to cover all concerns during consultations.
- ☑ Ensure proper wound care
- ☑ Wear post-surgery support garments as instructed
- ☑ Avoid activities that may hinder your recovery, including smoking, alcohol, exercise etc. [READ MORE](#)

Your safety is our top priority and failure to follow the above may result in your surgery being postponed or even cancelled.
